

Richard R. Forster
Professor, Department of Geography
University of Utah
Gardner Commons
Salt Lake City, Utah 84112

October 2023
801-581-3611
rick.forster@geog.utah.edu

I. GENERAL INFORMATION

A. Education

1997. Ph.D., Earth and Atmospheric Sciences, Cornell University. Major field - Geophysics (advisor: Bryan Isacks); Minor field – Remote Sensing, Concentration – Geomorphology.
1991. M.S., Electrical Engineering, University of Kansas. Major field – Radar Remote Sensing (advisor: Richard K. Moore).
1984. B.S., Electrical Engineering, Lafayette College, Easton, Pennsylvania. Concentration in electromagnetics.

B. Research and Teaching Interests

Climate change, Remote sensing of the Cryosphere, Glaciology, Radar interferometry.

C. Professional Experience

- 2010 – present. Professor, Department of Geography, University of Utah.
- 2014 – 2022. Associate Dean of Research, College of Social and Behavior Science University of Utah.
- 2018 Interim Director of NEXUS (iNterdisciplinary EXchange for Utah Science)
- 2013 – 2014. Interim Associate Dean, College of Social and Behavior Science University of Utah.
- 2004 – 2010. Associate Professor, Department of Geography, University of Utah.
- 1999 – 2004. Assistant Professor, Department of Geography, University of Utah.
- 1998 – 1999. Senior Research Associate, Byrd Polar Research Center, The Ohio State University.
- 1996 - 1997. Postdoctoral Research Fellow, Byrd Polar Research Center, The Ohio State University.
- 1991 – 1996. Graduate Research Assistant, Department of Geological Sciences, Cornell University.
- 1989 – 1991. Graduate Research Assistant, Department of Electrical Engineering, University of Kansas.

1984 – 1989. Field Engineer, The Hewlett Packard Company.

D. Other Professional Activities

2016 – present NASA Science Team for satellite mission: NASA/Indian Space Research Organization Synthetic Aperture Radar (NISAR), scheduled launch 2024.
2014 – 2016 NASA Standing Review Board member for the NISAR satellite mission representing the cryosphere
2012 – 2013 Academic Leadership training courses, University of Utah
2008 – 2011. Chair of the Advisory Board for NSF Science and Technology Center “Center for Remote Sensing of Ice Sheets (CReSIS)” at University of Kansas
2007 Advisory Board for NSF Science and Technology Center CReSIS
2005 – 2007 National Research Council – Space Studies Board, Earth Science and Applications from Space: A Community Assessment Strategy for the Future, Panel on Water Resources and the Global Hydrologic Cycle
2005 – 2007 Science Team Member for NASA project Glaciers and Ice Sheets Interferometric Radar
2005 – 2006 AAG chair and organizer of remote sensing of cryosphere sessions
2002 – 2004. Board of directors Cryosphere Specialty Group, American Association of Geographers (AAG)
1999 – 2004. Antarctic Mapping Advisory Group (AMAG), NASA.
1984. President, Eta Kappa Nu -Electrical Engineering Honor Society.
1983 – 1984. Selection Committee, National Presbyterian Scholarship.

E. Professional Honors and Awards

2021. NASA/JPL Team Award, NISAR DEM Down-selection Team
2018. Alta Sustainability Leadership Award: Sustainability Research
2018. Outstanding Mentor/Advisor (University of Utah, Geography)
2012. College Superior Research Award
2009. Student Choice Teaching Award – selected by the Associated Students of the University of Utah (also nominated in 2004)
2002. NASA New Investigator, Career development award for tenure-track faculty
2000. Group Achievement Award to the Antarctic Mapping Mission Team, National Aeronautics and Space Administration
1996 – 1997. The Byrd Post-Doctoral Fellowship, The Ohio State University, Byrd Polar Research Center
1988. 110% Seller Award, The Hewlett Packard Company.
1983 – 1984. Eta Kappa Nu -Electrical Engineering Honor Society, president.
1983 – 1984 Tau Beta Pi - Engineering Honor Society
1981 – 1984. National Presbyterian Scholar, Lafayette College.

II. RESEARCH AND RELATED ACTIVITIES

A. Research papers (published/accepted for publication) (78)

(* students or post-docs advised)

2023 Jewell Lund*, Richard Forster, Yusuf Jameel, Summer Rupper, Elias Deeb, Ghulam Dars, Azhar Zaheer, Masood Ali, Abdul Ghafoor, Muhammad Arfan, Glen Liston, Javed Akhtar, Steven Burian, Constraining Mountain Streamflow Constituents by Integrating Citizen Scientist Acquired Geochemical Samples and Sentinel-1 SAR Wet Snow Time-Series for the Shimshal Catchment in the Karakoram Mountains of Pakistan, *Water Resources Research*, <https://doi.org/10.1029/2022WR032171> .

B. Journal articles in Review

- Emma Marshall*, Summer Rupper, Richard. Forster, Leigh Stearns, Simon Brewer, Seasonal velocity differences between lake-terminating and land-terminating glaciers in the Langtang region of Nepal, submitted to Science Reports 9/2022, in revision.
- Elias J. Deeb*, Richard R. Forster, and Hans Peter Marshall, Estimating snow water equivalent (SWE) using L-Band interferometric synthetic aperture radar (InSAR), in revision, *Remote Sensing of Environment*.

C. Peer-reviewed Book chapters

- 2013 Lora Koenig, Richard Forster, Ludovic Brucker and Julie Miller*, Remote Sensing of Accumulation over the Greenland and Antarctic Ice Sheets, in Remote Sensing of the Cryosphere ed. Marco Tedesco, Wiley – Blackwell in press.
- 2010 Ronald L. Bruhn, Richard R. Forster, Andrew L.J. Ford*, Terry L. Pavlis, and Michael Vorkink, “Structural geology and glacier dynamics, Bering and Steller Glaciers, Alaska”, in Geological Society of America Monograph Bering Glacier: Interdisciplinary Studies of Earth’s Largest Temperate Surging Glacier, SPE462 eds. Robert A. Shuchman and Edward G. Josberger, ISBN: 978-0-8137-2462-1
- 2009 Jeffery VanLooy*, Richard. Forster, and Andrew Ford, “Accelerating thinning of Kenai Peninsula glaciers, Alaska”, in State of the Cryosphere: Glaciers and Ice Sheets, ed. Hamish Pritchard, AGU Special Publications Volume 60, SP0607314, ISBN: 978-0-87590-731-4.

D. Externally Funded Research Grants (Total PI and Co-I \$14,271,403)

1. Principal Investigator

a. Funded (Total \$4,811,353)

- 2022 – 2024 “Mountain glacier ice dynamics”, NASA, Science Team member for the NISAR mission, \$331,241
- 2020 – 2023 “InSAR snow water equivalent estimation and SAR snow wetness determination”, NASA, \$128,668
- 2019 – 2022 “Mountain Glacier Ice Dynamics and Cryosphere Applications of NISAR”, Science Team member for the NISAR mission, NASA, \$348,759.
- 2016 – 2019 “Monitoring glacier ice dynamics and assessment of velocity variability using spaceborne SAR data in preparation for NISAR”, NASA, \$342,267.
- 2014 – 2018 “Collaborative Research: The Greenland firn aquifer impacts on ice sheet hydrology: characterizing volume, flow, and discharge”, NSF – Arctic Natural Sciences, \$725,137
- 2013 – 2015 “An initial investigation of the Greenland perennial firn aquifer”, NSF EAGER– Arctic Natural Sciences, \$213,598
- 2013 – 2018 “Characterizing the perennial firn aquifer within the Greenland Ice Sheet”, NASA, Cryospheric Sciences, \$242,009
- 2011 – 2014 “Southeast Greenland snow accumulation and perennial firn aquifer investigation over the last decades using ground-penetrating radar, airborne NASA IceBridge radars and firn-core data”, NASA Graduate Student Fellowship, awarded to Clement Miede (PhD student), Forster is PI on the grant, \$90,000.

2009 – 2013	“Collaborative Research: Greenland Ice Sheet Snow Accumulation Variability: Filling Knowledge and Data Voids”, NSF – Arctic Natural Sciences, total amount \$653,745, Utah portion \$369,779
2009 – 2012	“Mechanisms of Alaskan glacier motion through observation of surface velocities and ice thickness”, NASA Graduate Student Fellowship, awarded to Evan Burgess (PhD student), Forster is PI on the grant, \$90,000.
2008 – 2013	“Alaska glacier velocities: Implications for large-scale glacier thinning/recession”, NASA, Cryospheric Sciences, \$543,722.
2006 – 2009	“Measuring Snow Water Equivalent Using Interferometric Synthetic Aperture Radar (InSAR)”, NASA Graduate Student Fellowship, awarded to Elias Deeb (PhD student), Forster is PI on the grant, \$72,000.
2005 – 2008	“Understanding ice-sheet surface elevation change: How much goes to the ocean?”, NASA, Cryospheric Sciences, \$122,200.
2005 – 2006	“Satellite and surface measurements of the hydrologic and economic impacts of All American Canal groundwater seepage to the Mexicali Valley/ Sand Hills”, Environmental Protection Agency, \$25,804.
2002 – 2005	“A Multi-Sensor (Multi-Scale) Approach to Snowmelt Detection Using Active and Passive Microwave Remote Sensing”, NASA – New Investigator Program, \$229,854
1999 – 2003	“The glacier dynamics and mass flux of Antarctic ice streams from Radarsat InSAR”, NASA - Polar Programs, \$146,060.
1998 – 2002	“The spatial and temporal characteristics of high latitude seasonal snow melt as detected by passive and active microwave sensors”, NASA – Earth Observing Systems, \$206,738.
1997 – 1999	“Determining Greenland Ice Sheet accumulation rates from radar remote sensing”, NASA - Polar Programs, \$299,55

2. Co-Principal Investigator/ Co- Investigator

a. Funded (Total: \$9,791,291 Utah portion \$2,061,086)

2019 – 2022	“Quantifying the contributions of mountain glaciers to sea level rise-past and future”, NSF GSS and CLD, PI: Summer Rupper, total amount \$422,732.
2010 – 2013	“Deployment of a radar instrumentation suite to monitor land and sea ice in support of Operation ICE Bridge”, NASA Cryospheric Sciences, PI: Carl Leuschen, Univ. Kansas, total amount \$3,434,875, Utah portion \$61,346.
2010 – 2013	“Collaborative research: Annual satellite era accumulation patterns over Wais Divide: A study using shallow ice cores, radars and satellites”, NSF – Antarctic Glaciology Program, PI: Summer Rupper, BYU, total amount \$525,850, Utah portion \$230,148.

2008 – 2013	“Geodetic Imaging of Glacio-Seismotectonic Processes in Southern Alaska”, NASA Solid Earth, Co-I, (PI – Jeanne Sauber, NASA Goddard), Total \$752,000, Utah portion: \$312,852.
2005 – 2009	“Investigation of Spatial and Temporal Variation in Snowpack Properties and Their Microwave Radiative Response Using High Resolution Broadband (2-18-GHz) Active Microwave Radar Measurements”, NASA Terrestrial Hydrology, Co-PI, (PI – Hans-Peter Marshall, Univ. CO, Boulder), Total \$474,074, Utah portion \$40,949.
2005	“An Integrated Field-based System for Fusion of Hyperspectral and Interferometric Radar Data to Support Feature Detection, Surface Characterization, and Change Detection”, Department of Defense, Co-PI, (PI – George Hepner, Univ. of Utah), \$197,391.
2003 – 2005	“Radar satellite (InSAR) monitoring of groundwater dynamics near the All-American canal (Calexico/Mexicali region)”, Environmental Protection Agency, Co-PI, (PI – Desmond Moser) \$74,946.
2000 – 2002	“SAR analysis of the Western Saint Elias Orogen, Alaska”, NASA, PI Ronald Bruhn, Univ. Utah, Geology and Geophysics, \$182,256 over three years (returned overhead split 50% to Geography, 50% to G.G.)
2000 – 2003	“Western Transportation Analysis Consortium”, Department of Transportation, Co-PI, University of Utah portion \$630,107 other Utah Investigators: Hepner, Miller, Cova, (Lead PI: Stan Morain, University of New Mexico, total award \$3,015,948).
1999 – 2002	“Sensitivity of the West Siberian Lowland to past and present climate”, NSF – Office of Polar Programs, University of Utah portion \$31,037 (PI: L. Smith, UCLA, total award \$711,219).

3. Data Grants Approved

2019 – 2021	“Snow Hydrology applications with PALSAR-2”, Japan Aerospace Exploration Agency (JAXA)
2016 – 2019	“Monitoring glacier ice dynamics and assessment of velocity variability in the Himalaya-Karakorum using PALSAR-2”, Japan Aerospace Exploration Agency (JAXA)
2008 – indefinite	“The Spatial and Temporal Characteristics of Seasonal Snow Melt as detected by Terra SAR X in Mountainous Terrain”, German Aerospace Center (DLR).
2008 – 2012	“Measuring Snow Wetness using Radarsat-2”, Canadian Space Agency
2004 – indefinite.	“Ice surface elevation changes on the Patagonian Icefields”, European Space Agency – CryoSat Satellite Mission.

- 2000 – 2011. “The Spatial and Temporal Characteristics of the Arctic Seasonal Snow Melt as detected by ALOS PALSAR and other microwave sensors”, National Space Development Agency of Japan.
- 1999 – 2002 “Changes in the Antarctic Peninsula ice margin and their effects on the upstream glacier dynamics”, European Space Agency – European Remote-sensing Satellite Mission.
- 1999 – indefinite. “The spatial and temporal characteristics of the Arctic seasonal snow melt as detected by Envisat ASAR and other microwave sensors”, European Space Agency – Envisat Mission.
- 1999 - 2005 “The Alaskan SAR Facility Radarsat Interferometric SAR Working Group: An assessment of R1 InSAR”, NASA – Alaskan SAR Facility.
- 2000 – 2004. “Flooding and ice break-up dynamics of large arctic river systems”, CoI, L. Smith UCLA PI, National Space Development Agency of Japan.

F. Papers and Posters Presented at Professional Conferences (169)

- 2023 Richard R Forster, Smriti Srivastava*, Sushil Singh, Sandip Oza, Mohd Farooq Azam and Summer Rupper, Snow and ice condition seasonality of the Zaskar region, India from Synthetic Aperture Radar (SAR) and ground observations in preparation for NISAR, AGU 2023.
- 2023 Avina Khatri*, Richard R Forster, Summer Rupper, Mapping Snowmelt Timing Using Cumulative Sum with Sentinel-1 In Nepal, AGU 2023.
- 2023 Smriti Srivastava*, Richard R Forster, Summer Rupper, Calibration of snow cover using HiMAT products and SAR time series for glacio-hydrological modelling in High Mountain Asia, AGU 2023.
- 2023 Emma Marshall*, Victor Devaux-Chupin, Gregoire Guillet, Summer Rupper, Richard R Forster, David E Shean, Jessica Scheick, Douglas Brinkerhoff, Mark A Fahnestock, Martin Truffer and Scott T Henderson, Streamlined processing and analysis of glacier surface velocity data using ITS_LIVE Tools, AGU 2023.
- 2023 Victor Devaux-Chupin, Emma Marshall*, Gregoire Guillet, Martin Truffer, Douglas Brinkerhoff, Mark A Fahnestock, Jessica Scheick, Summer Rupper, Richard R Forster and David E Shean, ITS_LIVE Tools: a comprehensive python package and interactive notebooks to download and analyze global glacier surface velocity data, AGU 2023.
- 2023 Gregoire Guillet, Victor Devaux-Chupin, Emma Marshall*, David E Shean, Richard R Forster, Martin Truffer, Bayesian Inversion and Uncertainty Quantification for Remotely Sensed Glacier Surface Velocities, AGU 2023.
- 2023 Olivia Miller, Douglas Kip Solomon, Cliff Voss, Clément Miège, Lora Koenig, Richard R Forster, States, Nicholas C Schmerr, Lynn Montgomery, Anatoly Legchenko, Field observations and modeling of a firn aquifer in

- southeast Greenland identifies key hydrologic processes and suggests future impacts, AGU 2023.
- 2022 Jewell Lund*, Richard Forster, Yusuf Jameel, Summer Rupper, Elias Deeb, Ghulam Dars, Glen Liston, Muhammad Arfan, Steven Burian, Constraining mountain streamflow constituents by integrating citizen scientist acquired geochemical samples and Sentinel-1 SAR wet snow time series for the Shimshal catchment in the Karakoram Mountains of Pakistan, AGU 2022.
- 2022 Richard Forster, University of Utah Jewell Lund, Elias Deeb, Hans-Peter Marshall, Time series of L-band InSAR for Evaluation of Coherence and SWE Estimation from SnowEx in Preparation for NISAR, AGU 2022.

H. Field-based Research Activities

2023	Daniel Pass, UT., Supported an NSF funded “Snow School” teaching a group of domestic and international graduate students and early career scientists using a car-based interferometric synthetic aperture radar system. March 6 – 9.
2023	Grand Mesa, CO. Supported NASA field campaign to support overflight of an experimental radar system to measure snow water equivalent (SWE) using a snowmobile-based interferometric synthetic aperture radar system. Jan 29 to Feb 3.
2022	White Cloud Preserve, Central Idaho, Supported CRREL field campaign to of an experimental radar system to measure soil moisture using a car-based interferometric synthetic aperture radar system. Oct. 3 to 6.
2021	Salt Lake City, UT: As part of the NASA SnowEx campaign conducted ground-based radar experiments to measure snow water equivalent (SWE) from a car and a stationary location. Jan. to March.
2020	Boise, ID: Ground-based radar experiments to measure snow water equivalent (SWE) from a moving snowmobile and car and a stationary location. March 9-13.
2017	Greenland Ice Sheet: measurements of melt processes from ice cores and subsurface water flow in the ablation zone of SW Greenland from an ice base camp in collaboration with UCLA and Rutgers University. July 18-August 1.
2016	Greenland Ice Sheet: Lead a six person team on a helicopter assisted field camp to the southeast Greenland ice sheet to collect firn aquifer data using groundwater techniques, GPR, seismic refraction, magnetic resonance sounding, and self potential. Drilled three cores, measured density and water content. Installed a data logger with daily satellite uplink of borehole water pressure. July 17 – August 10.
2014	Greenland Ice Sheet: Lead a three person team on a helicopter assisted field camp to the southeast Greenland ice sheet to service in situ instruments with daily satellite uplink and test aquifer sampling techniques. March 21 – April 13.
2014	Utah: Time domain reflectivity (TDR) measurements of snow pack properties during spring snowmelt progression coincident with snow pit measurements at the Guard Station Alta, Utah. April-May.
2013	Greenland Ice Sheet: Lead a five person team on a helicopter assisted field camp to the southeast Greenland ice sheet to acquire data of the Greenland aquifer we discovered in 2011. Drilled two cores, measured density and water content. Installed a data logger with daily satellite uplink of borehole temperatures. March 25 – April 12.
2012	Wind River Range, Wyoming: Measured glacier ice thickness on Continental Glacier using surface-based profiling radar and ice surface elevations with

- GPS and laser range finder in collaboration with University of North Dakota. August 4-19.
- 2012 Greenland Ice Sheet: discharge measurements of supra glacial stream networks in the ablation zone of SW Greenland from an ice base camp in collaboration with UCLA and Rutgers University. July 13-27.
- 2011 Wind River Range, Wyoming: Measured glacier ice thickness on Continental Glacier using surface-based depth sounding radar and ice surface elevations with GPS and laser range finder in collaboration with University of North Dakota. July 31 – August 11.
- 2010 Greenland Ice Sheet: Lead a five person field team on a 500 km snowmobile traverse of the Greenland ice sheet. Three 50 m firn cores were extracted and 235 km of ice penetrating radar profiles collected. April 5 – May 13.
- 2009 Greenland: Hydrological and remote sensing field work near Kangerlussuaq, Greenland (surveyed topographic profiles and surface roughness across stream channels in support of a JPL airborne InSAR derived DEM, and measured discharge in ice marginal streams) May 26 – June 6.
- 2008 Utah: Ground based radar measurements of snow pack properties coincident with surface wetness and snow pit measurements at the guard station Alta, Utah. May 13.
- 2008 Greenland: Hydrological and remote sensing field work near Kangerlussuaq, Greenland (measured spectral reflectance and suspended sediment concentrations in fjord and lakes, installed pressure transducers in ice marginal streams to record stage, measured discharge in ice marginal streams) June 1-10.
- 2007 Colorado: Cold Land Process Experiment part two (CLPX-II) – NASA snow experiment, conducted field-based radar experiments of snow pack properties coincident with surface wetness and snow pit measurements at several sites in and around Steamboat Springs, CO. Feb. 22 – 27.
- 2004 Alaska: Glaciological field work on the Matanuska Glacier, Alaska (measured ice velocity and ice thickness) – Flew onboard the NASA/JPL DC-8 while acquiring AirSAR data of Alaskan glaciers, Sept. 20-24.
2003. Alaska: Glaciological field work on the Bering, Sheridan and Childs Glaciers, Alaska (measured ice velocity and ice thickness)– supported by NASA project “SAR analysis of the Western Saint Elias Orogen, Alaska”, Sept. 29-Aug. 9.
- 2003 Alaska: Field work on the North Slope of Alaska, measuring snow properties at snow pits and comparing with ground-based and spaceborne remote sensing data, May 6-21, 2003.
- 2003 Colorado: Cold Land Process Experiment (CLPX) – NASA snow experiment, conducted field-based remote sensing experiments at Fraser Experimental Forest, Walden and Buffalo Pass, CO, March 25-30.

- 2003 Colorado: Cold Land Process Experiment (CLPX) – NASA snow experiment, conducted field-based remote sensing experiments at Fraser Experimental Forest, Walden and Buffalo Pass, CO, February 17-24.
- 1995 Chile: Glaciological measurements of the San Rafael Glacier, North Patagonia Icefield, Chilea for ground truth of previously acquired NASA SIR-C/X-SAR radar data. December 10 – Jan 10.
- 1994 Bolivia: Glacier characterization for simultaneous overflight of NASA Space Shuttle Endeavor with SIR-C/X-SAR radar onboard. Measured ice roughness, snow density, wetness, grain size, temperature. Measured snow depth along transects and mapped transient snowline. near LaPaz, Bolivia: April 9 – 20
- 1993 Bolivia: Glacier and moraine characterization for simultaneous overflight of NASA/JPL AirSAR. Measured ice roughness, snow density, wetness, grain size and temperature. Collected moraine rock samples for cosmogenic exposure dating. Built and installed radar calibration targets on glaciers. near LaPaz, Bolivia: May 28 – June 13.
- 1989 Antarctica: Mapped ice thickness and bottom roughness of Ice Stream B with ice penetrating radar deployed with a snow cat. Measured radar reflection from annual accumulation layers in the snow/firn with a ground-based X-band radar. November – January

Invited Lectures, Presentations and Participation

- 2021 external reader for PhD dissertation defense, Aaron Thompson, “Developing Parameter Constraints for Radar-based SWE Retrievals”, University of Waterloo, Canada, Dec. 16.
- 2019 invited Dean’s Distinguished Lectureship Social and Behavioral Sciences Rutgers University, “Discovery and exploration of a new meltwater reservoir within the Greenland ice sheet”, February 22.
- 2019 invited participant National Academy of Sciences Workshop on Evolving the Geodetic Infrastructure, Beckman Center, Irvine, CA, February 11-12.
- 2018 invited participant Launch Conference Islamabad National University, Islamabad, Pakistan, December 21-22.

- 2017 invited talk at National Science Foundation workshop “How Stable is the Greenland Ice Sheet?” hosted by the University of Buffalo, Buffalo, NY, September 11-12.
- 2016 invited talk at workshop hosted by Geological Survey of Denmark and Greenland (GEUS), “Observing and modelling meltwater retention processes in snow and firn on ice sheets and glaciers” Copenhagen, DK, June 1-3.
- 2016 invited talk at the “3rd Chinese Academy of Science-NASA Workshop on the Use of Earth Observations to Address Glacier Change and Associated Hazards in High Mountain Asia”, Sanya, China, March 14-16.
- 2016 invited talk at National Geospatial Intelligence Agency, Springfield, VA, “Remote sensing and field measurements on the Greenland Ice Sheet”, Jan 19.
- 2015 invited talk at the “2nd Chinese Academy of Science-NASA Workshop on Snow and Glacier Change and Related Natural Disasters in High Mountain Asia”, Mammoth, CA, September 9-11.
- 2015 invited talk at the “International Glacier Symposium: How much do we know about the glaciers of the high Himalayas?”, Bumthang, Bhutan, April 13-19.
- 2015 invited talk at Intermountain Healthcare Sustainability Conference, “Society, Water, and Climate”, with Andrea Brunelle, Park City UT, Nov 3.
- 2015 invited talk at the “Chinese Academy of Science-NASA Workshop on the Use of Earth Observations to Address Glacier Change and Associated Hazards in the Hindu Kush-Himalayas”, Kathmandu, Nepal, January 20-23, 2015.
- 2013 invited talk Cornell University, Earth and Atmospheric Sciences, “Extensive Liquid Meltwater Storage Discovered within the Greenland Ice Sheet Firn”, Nov. 1.
- 2013 invited talk Guy F. Atkinson Distinguished Lecture Series, Geology and Geophysics, Univ. of Utah, “Extensive Liquid Meltwater Storage Discovered Within the Greenland Ice Sheet Firn”, Sept. 5.
- 2013 Invited talk at the National Centre for Meteorological Research, Snow Research Centre, Grenoble, France, Jan 30.
- 2012 invited talk BYU Geology “Greenland Ice Sheet snow accumulation rates from field measurements and remote sensing”, Provo, UT, Feb. 9, 2012
- 2012 presentation at NASA Greenland meeting “Near-surface water layer discovered within the Greenland Ice Sheet during winter conditions from firn cores, ground based radar, and Operation IceBridge radars” NASA Goddard, Jan. 25-26.
- 2011 presentation at NASA Greenland meeting “Arctic Circle Traverse 2010 and 2011(ACT-10/11):South East Greenland snow accumulation variability from firn coring and ice sounding radar” NASA Goddard, Jan. 19-20.
- 2011 invited talk to West High School environmental science class, “Greenland ice sheet and climate change”, Jan. 9.
- 2010 invited talk for Utah Museum of Natural History, Science Movie Night at the Salt Lake City downtown library, “A Greenland ice sheet snowmobile traverse to measure snow accumulation”, Oct. 5
- 2010 invited talk at NASA Goddard Space Flight Facility “Alaska glacier velocity variability and a field campaign to measure SE Greenland accumulation coincident with IceBridge” Aug. 30.
- 2010 external reader for PhD dissertation defense, Randall Scharien, “Physical and polarimetric C-band microwave scattering properties of first-year sea ice during advanced melt”, University of Calgary, Canada, Aug. 2-3.
- 2010 invited talk to Skyline High School environmental science class, “Greenland ice sheet and climate change”, May. 28.

2009 invited plenary talk, “Geodetic imaging of the cryosphere: Recent advances and future directions”, UNAVCO Long-Range Science Goals for Geodesy Community Workshop, Salt Lake City, UT, Oct. 5-6.

2009 presentation, “The Southeast Greenland Traverse and Alaska Glacier Velocities”, NASA Greenland meeting, Seattle WA, Nov. 30-Oct. 1.

2009 Undergraduate Research Presentations with Julie Miller*, “Estimating snow accumulation on the Greenland Ice Sheet with satellite data” University of Utah, March 31.

2009 NSF site visit for Science and Technology Center “CReSIS”, representing the Advisory Board as Chair, Lawrence, Kansas, February 9-11.

2008 NSF site visit for Science and Technology Center “CReSIS”, representing the Advisory Board as Chair, Lawrence, Kansas, March 24-25.

2008 Advisory Board (Chair) meeting for NSF Science and Technology Center “CReSIS”, Lawrence, Kansas, March 5-7.

2008 Invited talk at NASA Goddard “Surface elevation change using SRTM and ice velocity measured with L-band InSAR on example North American glaciers”, Greenbelt, MD, February 14.

2008 NASA Ice Sheet meeting, Boulder, CO, Feb. 3-5.

2007 NASA Science Workshop “Deformation, Ecosystem Structure, and Dynamics of Ice (DESDynI)” invited participant, Orlando, FL, July 16-19.

2007 Spring Runoff Conference, Logan Utah, April 5-6.

2007 Advisory Board meeting for NSF Science and Technology Center “CReSIS”, Lawrence, Kansas, February 19-20.

2007 NASA Ice Sheet meeting, Jet Propulsion Lab, Pasadena, CA, January. 28-30.

2006 Symposium in Honor of Bryan Isacks (PhD Advisor), presented “Alaskan Glaciology from Space”, Ithaca, NY, October 8-10.

2006 Collaborative visit to NASA Goddard, host Jeanne Sauber, April 10.

2006 Science Team Meeting for NASA project Glaciers and Ice Sheets Interferometric Radar, Columbus, OH, April 2-3.

2006 Spring Runoff Conference, Logan Utah, March 27-28.

2005 National Research Council meeting, Seattle, WA, November 13-16.

2005 NASA Ice Sheet meeting, Baltimore, MD, October. 23-26.

2005 West Antarctic Workshop (WAIS) workshop, NASA/NSF, Sterling, VA, September 28-30.

2005 Science Team Meeting for NASA project Glaciers and Ice Sheets Interferometric Radar, Sterling, VA, September 26-27.

2005 Collaborative visit to NASA Goddard, host Jeanne Sauber, September 21-24

2005 National Research Council meeting, Irvine, CA, August 27-31.

2005 National Research Council meeting, Boulder, CO, May 8-11.

2005 NASA Cold Lands Process Workshop, Seattle, WA, March 22-24.

2004 NASA/NSF InSAR workshop, invited participant, Oxnard, CA, October 20-22.

2004 IGARSS, Anchorage, AK, September 22.

2004 invited presentation NASA Earth System Scholars, “Snow and Ice Measurements Using Microwave Remote Sensing”, College Park, MD, September, 26-29.

2004 Plenary Presentation at Tenth Biennial USDA Forest Service Remote Sensing Applications Conference, “Remote sensing and GIS at the University of Utah”, Salt lake City, UT, April 5.

2004 Cold Land Process Workshop –Specification of a NASA satellite mission for measurement of snow properties Steamboat Springs, CO, March 3-5.

- 2003 National Science Foundation - Study of Environmental Arctic Change (SEARCH) Open Science Meeting, Seattle, WA, Oct. 27-29.
- 2003 Cold Land Process Experiment Workshop – Review of data sets and definition of a NASA satellite mission for measurement of snow properties Boulder, CO, May 28-29.
- 2002 Geospatial Workforce course Creation Fellows Workshop, Gulfport, MS, July 26-28.
- 2002 Geospatial Workforce Development Workshop, University of Mississippi, Oxford, MS, June 4-5.
- 2002 Cold Land Process Experiment (CLPX) – NASA snow experiment, conducted field-based remote sensing experiments at Fraser, CO, March 25-28
- 2001 Workshop for Cold Land Process Experiment (CLPX) – NASA snow experiment, Boulder, CO, November 6-9
- 2001 Antarctic Mapping Advisory Group (NASA) meeting / InSAR Applications to Glaciology Workshop, Vexcel Inc., Boulder CO, May 3-4, 2001.
- 2001 Department of Transportation Remote Sensing meeting, University of Florida, Gainesville, FL, March 20-22.
- 2000 ASPRS Intermountain Region Fall Technical Meeting, Utah State University September 29.
- 2000 ASPRS Intermountain Region Spring Technical Meeting, presentation: “Interferometric Radar: What is it used for and how does it work?”, University of Utah, April 17.
- 2000 Antarctic Mapping Advisory Group (NASA) meeting, The University of Washington, Seattle, WA, January 20 – 21.
- 1999 “Interferometric Synthetic Aperture Radar (InSAR) Theory and Application to Glacier Dynamics and Other Ground Displacement Phenomena”, Distinguished Lecture Series, Geology and Geophysics, University of Utah, November 18.
- 1999 Workshop on Applications of Remotely Sensed Data to Transportation, Center for Mapping, The Ohio State University, Columbus, OH, August 12-13.
- 1999 “Relationships between radar backscatter and accumulation rate on the Greenland Ice Sheet”, BYU Department of Electrical Engineering, February 9, host David Long.
- 1997 “Synthetic aperture radar applications to calving glaciers”, *International Workshop on Calving Glaciers*, The Ohio State University, Columbus OH, Feb. 28 - Mar. 2.
- 1997 “Accumulation rate variability in Central Greenland from microwave remote sensing”, *Remote Sensing of Ices Workshop*, Flagstaff AZ, June.
- 1996 “SIR-C interferometry of the South Patagonian Icefield”, *Alaskan SAR Facility InSAR Meeting*, Fairbanks, AK, July 31-August 2.
- 1993 “Glacialogical Studies in the Central Andes using AIRSAR/TOPSAR”, *Summaries of the Forth Annual JPL Airborne Geosciences Workshop*, JPL:93-26, 13-15.
- 1992. “Preliminary Results of Polarization Signatures for Glacial Moraines in the Mono Basin, Eastern Sierra, Nevada”, *Summaries of the Third Annual JPL Airborne Geosciences Workshop*, JPL:92-14, v. 3, 40-42.

I. Membership in Professional Organizations

2000 – present ASPRS

1999 – present. Association of American Geographers
 1997 – present. International Glaciological Society
 1996 – present. Institute of Electrical and Electronics Engineers
 1992 – present. American Geophysical Union

III. SERVICE

A. Professional and Community Service

1. External Review of Retention, Promotion and Tenure (RPT)

8 cases

2. Proposal Review Panels

Agency	Panel	Date	Program Manger
NASA	Planetary Mission		
NSF	Glaciology	October 28,-29, 2019	Paul Culter
NASA	Planetary Mission		
NASA	Terrestrial Hydrology	November 2-3, 2017	Jared Entin
NASA	Cryospheric Sciences	August 27-29, 2014	Thomas Wagner
NASA	Sea Level Rise – Glaciology	November 4, 2013	Thomas Wagner
NSF	Arctic Natural Sciences	April 11-15, 2011	Henrietta Edmonds
NASA	Remote Sensing Theory	Feb. 14-16, 2011	Lucia Tsaoussi
NASA	Terra and Aqua Land Science	July 11-13, 2010	Diane Wickland
NOAA	Climate Change Data Sets	March 23-25, 2009	Jeff Privette
NASA	Cryospheric Sciences	February 3-5, 2008	Seelye Martin
NSF	Antarctic Geology and Geophysics	September 20-21, 2006	Thomas Wagner
NSF	Antarctic Glaciology	September 19-20, 2006	Julie Palais
NASA	New Investigator Program	April 11-13, 2006	Ming Ying Wei
NASA	Cryospheric Sciences	March 13-14, 2002	Waleed Abdalati
NASA	Polar Programs	May 18-19, 2000	Kim Partington

3. Proposal Reviewer

Agency	Program
<i>NSF</i>	<i>CAREER</i>
<i>NSF</i>	<i>Antarctic Glaciology</i>
<i>NASA</i>	<i>Cryospheric Sciences</i>
<i>Netherland Organization for Scientific Research</i>	<i>Earth Observation Research</i>

4. Scientific Reviewer

Journal	Service
<i>Science</i>	ongoing
<i>Nature</i>	ongoing
<i>Nature Geoscience</i>	ongoing
<i>IEEE Transactions on Geoscience and Remote Sensing</i>	ongoing
<i>IEEE Geoscience and Remote Sensing Letters</i>	ongoing

5. Professional Committees

- 2013 – 2017 Alaska Satellite Facility User Working Group
- 2008 – 2011. Chair of the Advisory Board for NSF Science and Technology Center “Center for Remote Sensing of Ice Sheets (CReSIS)” at University of Kansas
- 2005 – 2007 National Research Council-Space Studies Board, Earth Science and Applications from Space: A Community Assessment Strategy for the future.
- 2002 – 2004 Board of directors Cryosphere Specialty Group, American Association of Geographers 2002-2004

B. Departmental Service

- 2010 – 2012 RPT Committee Chair
- 2006 – 2007 Director of Geographic Information Sciences (GIS) Certificate Program
- 2004 – 2005 Director of Graduate Studies
- 2001 – 2005 Geographic Information Science Committee Chair, Department of Geography, University of Utah
- 2002 – present Graduate Student Selection Committee, Department of Geography, University of Utah
- 1999 – present. Geographic Information Science Committee, Department of Geography, University of Utah
- 1999 – 2004 Selected and graded a *general question* for the Masters qualifying exam

C. College Service

- Associate Dean of Research, College of Social and Behavioral Science (2014 – 2022)
- CSBS Dean search committee (2021-2022)
- Interim Associate Dean, College of Social and Behavioral Science (2013 – 2014)
- CSBS Dean search committee (2008-2009)
- Superior Research Award Committee (2002, 2008)
- Curriculum Committee (2007)
- Adjunct Faculty Review Committee (2008 – 2012)
- RPT Committee (2010 – 2013)

D. University Service

- One U Research Council Working Group (2022 – present)
- American Council of Learned Societies Post-Doc review committee (6/2021)
- Reviewer for COVID-19 Seed Grants VPR and 3i Initiative (4/2020)
- Utah Informatics Initiative Committee (2019 – present)
- NEXUS Executive Committee (2018 – present)
- Celebrate U Task Force (2016 – 2019)
- One-U Advisory Board (2019 – 2020)
- Interim Director NEXUS (2018)
- Search Committee Chair for Director of Research Development (2017)

Search Committee Chair for Manger of Research Development (2017)
 Funding Incentive Seed Grant Program (2016)
 Research Instrumentation Fund (2016 – 2017)
 Graduate Student Support/Tuition Ad Hoc Committee (2015 – 2018)
 Eccles Fellowship Committee (2015 – present)
 Search committee for Vice President of Research (2015-2016)
 Steering Committee for new CSBS building (2015-2018)
 Graduate program review Department of Electrical Engineering (Nov. 2008)
 Academic Senate (2009 – 2012, elected by Social and Behavior Science faculty)
 Adjunct Faculty Review Committee (2009 – 2011)

IV. TEACHING

A. Courses 1999 - 2017

GEOGR 3110 The Earth from Space: Remote Sensing of the Environment (3 credit hours)
GEOGR 5110/6110 Environmental Analysis Through Remote Sensing (3)
GEOGR 6000 Advanced Geospatial Statistics (3)
GEOGR 5130/6130 Advanced Remote Sensing Applications (3)
GEOGR 6960 Microwave Remote Sensing - Graduate seminar (3)
GEOGR 6960 Glaciology and Climate Change - Graduate seminar (3)
GEOGR 3292/5292 Snow and Ice - (3)
GEOGR 3290/5290 Water in Utah - (3)

B. Graduate Committees

1. Chaired Ph.D. committees

1999 – 2002	Baumgras, Lynne, “Initiation of snowmelt on the North Slope of Alaska as observed with spaceborne passive microwave data” Recipient of a NASA Graduate Student Fellowship 1999 – 2002. (AMEC Geomatrix)
1999 – 2003	Gluch, Renee, “Mapping the urban thermal pattern in the Salt Lake Valley using ATLAS remotely-sensed data” (Brigham Young University)
2003 – 2007	VanLooy, Jeffery, “Analyzing North American Glaciers and sea level rise using digital elevation models and synthetic aperture radar imagery” (Associate Professor, University of North Dakota)
2003 – 2008	Han, Joo-Yup, “InSAR analysis of surface deformation due to aquifer stress”
2010 – 2011	Jin, Zhenyu, “Mapping and spatial-temporal modeling of bromus Tectorum invasion in Central Utah”
2004 – 2012	Deeb, Elias, “Snow pack characterization with remote sensing” Recipient of a NASA Graduate Student Fellowship (Research Scientist, Cold Regions Research and Engineering Lab – CRREL, Hanover, NH)
2008 – 2013	Burgess, Evan, “Spatial and temporal variability in Alaska glacier velocities from synthetic aperture radar (SAR)”, Recipient of a NASA Graduate Student Fellowship (Geospatial Data Scientist - Air Sciences Inc.)
2009 – 2013	Bryant, Annie, “The effects of dust deposition on seasonal snowmelt”, Recipient of a NASA Graduate Student Fellowship

2010 – 2014	Turin, James, “Alaska glacier velocities from Landsat time series”
2010 – 2015	Miege, Clement, “Measuring ice sheet accumulation rates from firn cores, ground-based and airborne radars”, Recipient of a NASA Graduate Student Fellowship
2011 – 2017	Selkowitz, David, “Snowmelt pattern time series from Landsat and MODIS satellite data” Recipient of a USGS SCEP (student career employment program) fellowship (USGS, Carson City, NV)
2012 – 2017	Miller, Julie, “Greenland ice sheet snow accumulation rates from spaceborne microwave remote sensing”
2017 – 2018	Warren Scott
2018 – 2022	Jewell Lund, “Integrating transdisciplinary approaches to assessing mountain snowmelt utilizing field-based methods, space-borne radar, physically based snowmodel, and co-produced climate knowledge
2022 – present	Avina Kharti (co-advising with Summer Rupper)

2. Membership on Ph.D. committees

1999 – 2001	Chen, Che-Ming, “Investigation of imaging spectroscopy for discriminating urban land covers and surface materials”
2001 – 2003	Hung, Ming-Chin, “Remote sensing and GIS for urban environmental modeling, monitoring and visualization”
2001 – 2004	Hernandez, Michael, “A procedural model for developing a GIS-based multiple natural hazard assessment: Case study-Southern Davis County, Utah”
2001. – 2004	Shoukry, Nermin, “Using remote sensing and GIS for monitoring settlement growth expansion in the eastern part of the Nile Delta Governorates in Egypt (1975-1998)”
2002. – 2005	Beitler, Brenda (Department of Geology and Geophysics), “Sandstone bleaching and iron concentrations: An index to fluid pathways and diagenetic history in Jurassic Navajo Sandstone, Southern Utah”
2002 – 2005	Bloom, Amy, “Using diatoms to quantitatively infer past climate and environmental conditions on the Sierra Nevada, California, USA”
2002 – 2011	Hadley, Heidi, “Transit sources of salinity loading in the San Rafael River, Colorado River Basin, Utah”
2002 – 2008	McNeally, Phoebe, “Holistic geographic visualization of spatial data with applications in avalanche forecasting”
2004 – 2008	Willis, Julie (Department of Geology and Geophysics), “Subduction boundary controls on intracontinental deformation: Tectonic geomorphology and kinematic models of the interior southern Alaska tectonic block”
2005 – 2010	Shizuo Nishizawa
2009 – 2011	Morris, Jesse
2008 – 2009	Han, WooSuk (Department of Civil and Environmental Engineering), “Use of satellite rainfall data for global flood modeling in urban areas: Error assessment and development of Modeling advances”

2008 – 2014	Baskin, Robert, “Mapping and analysis of the occurrence and distribution of stromatolitic forms in the Great Salt Lake, Utah”
2008 – 2011	Michishita, Ryo,
2009 – 2011	Lundeen, Zachary
2009 – 2013	Yuan Zhang
2010 – 2014	Kristine Blickenstaff (Department of Civil and Environmental Engineering)
2012 – 2015	Yi Qi
2015 – 2016	Jessica Wempen (Department of Mining Engineering)
2016 – 2021	Durban Keeler
2016 – 2021	Eric Johnson
2016 – 2021	Matt Olson
2018 – 2020	Lynn Montgomery (University of Colorado)
2021 - 2023	Chelsea Ackroyd
2021 – present	Emma Marshall (co-advising with Summer Rupper)
2022 -present	Otto Lang
2023 – present	Pat Naple
2022 – present	Mark Radwin (Geology and Geophysics)

3. Chaired Master's committees

2000 – 2004	Deeb, Elias, “Identifying and Measuring Glacial Velocities of Tributary Ice Streams in Antarctica Using Interferometric Synthetic Aperture Radar”, Graduated August 2004 (PhD student University of Utah)
1999 – 2008	Smith, Greg, “Extracting scientific meaning from physiographic datasets to develop a flash flood potential index”. (National Weather Service)
2001 – 2002	Koenig, Lora, “The evaluation and development of passive microwave snow water equivalent algorithms in the Kuparuk River watershed, Arctic Alaska, USA”, Graduated December 2002 (PhD student University of Washington)
2002 – 2004	Baruah, Angira, “An integration of active microwave remote sensing and a snowmelt runoff model for stream flow prediction in the Kuparuk watershed, Arctic Alaska”, Graduated Nov. 2004 (PhD student University of Maryland)
2003 – 2004	Kenney, Terry, “Cross-sectional progression of vertical streamflow velocity distributions, apparent bedload velocities, and channel geometry, Green River, Utah”, Graduated Nov. 2004 (USGS Hydrologist)
2004 – 2005	Taylor, Kathie, “Quatifying changes in cottonwood recruitment along the Truckee River in response to instream flow releases for riparian vegetation development”, Master of Science and Technology Program (Otis Bay Ecological Consultants)
2004 – 2007	Edgar, Timothy, “Analysis of radar glacier zones on the Southern Patagonia Icefield” (PhD student University of Utah)
2004 – 2008	Naisbitt, William Adam, “Avalanche frequency and magnitude: Using power-law exponents to investigate snow avalanche size proportions through time and space” (Utah Dept. of Transportation)
2005 – 2008	Bair, Andrea , “Spatial analysis of the forecast skill of the local three-month temperature outlook in the western United States” (National Weather Service)
2008 – 2009	Burgess, Evan, “A Spatially Calibrated Model of Annual Accumulation Rate on the Greenland Ice Sheet (1958-2007)” (PhD student University of Utah)
2008 – 2010	Turin, James, (PhD student University of Utah)
2005 – 2010	Halseth, Deanna (Energy Solutions)
2010 – 2012	Miller, Julie (PhD student University of Utah)

2011 – 2014	Gold, Brittany, “Seasonal snowpack characterization using time domain reflectometry (TDR)”
2014 – 2015	Laura McNerney, “Constraining the Greenland firn aquifer’s ability to hydro-fracture a crevasse to the bed of the ice sheet”.
2015 – 2018	Jewell Lund, “Synthetic Aperture Radar snow conditions: seasonal and diurnal signals in the Upper Indus Basin” (PhD student University of Utah)
2014 – 2017	Noah Brautigam

4. Membership on Master's committees

1999 - 2000	McNeally, Phoebe, “Avalanche slide path stability modeling using GIS”.
2002 – 2005	Hanson, Molly, A Pleistocene-Holocene transition in the Greater Owens River System and other basins within the Great basin, USA: Paleohydrologic patterns”
2004 – 2006	McDaniel, “An agent-based model of civil unrest”
2007	Edwards, Heidi, “Harnessing the wind for Daybreak”, Master of Science and Technology
2007 – 2008	Talbot, Nathan, (Department of Civil and Environmental Engineering) “Satellite-based study of potential water demand reduction from urban landscape modification in Salt Lake City, UT”
2007 – 2008	Graves, Scott, “Examining vegetation phenology of Ugandan dambos using spectral mixture modeling fractions”
2008 – 2009	Culpepper, John, “Analysis of terrestrial ground-based lidar datasets on active lava flow processes and the geomorphology of Pu’u O’o, Hawaii”
2006 – 2010	Beaty, Mark
2010 – 2011	Cotton, Michelle (Geology and Geophysics)
2010 – 2013	Lebaron, Anthony (Mining Engineering)
2015 – 2016	Michelle Meadows
2018 – 2019	Collin Riley
2018 – 2020	Kate Baustian
2019 – 2021	Morgan McDonnell: Co-Advised with Summer Rupper
2019 – 2021	Emma Marshall: Co-Advised with Summer Rupper
2020 – 2021	Bailey Simmons (Department of Mining Engineering)

C. Post-doctoral Researchers

2022 – present	Smriti Srivastava, supported by NASA grant “NISAR: Mountain Glacier Ice Dynamics”
2020 - 2021	Alexandra Giese, supported by NASA grant “Mountain Glacier Ice Dynamics and Cryosphere Applications of NISAR”,
2015 – 2018	Miege, Clement, supported by NSF grant, “Collaborative Research: The Greenland firn aquifer impacts on ice sheet hydrology: characterizing volume, flow, and discharge”

- 2001 – 2004 Ford, Andrew, supported by the following grants, “The glacier dynamics and mass flux of Antarctic ice streams from Radarsat InSAR”, “SAR analysis of the Western Saint Elias Orogen, Alaska” and “Radar satellite (InSAR) monitoring of groundwater dynamics near the All-American canal (Calexico/Mexicali region)” (Faculty Bournemouth University).
- 2009 – 2010 Han, Joo-Yup , supported with a NASA Goddard post doc grant to study snowmelt runoff with MODIS satellite data.
