

## **Timothy J. Garrett**

### **Education**

*University of Washington*, Ph.D., Atmospheric Sciences, 2000

*University of Washington*, M.S. Atmospheric Sciences, 1995

*University of Waterloo*, B.Sc. Honours Physics, 1992

### **Academic appointments**

Professor with Tenure, Department of Atmospheric Sciences, *University of Utah*, 2014 - present

Associate Professor with Tenure, Department of Atmospheric Sciences, *University of Utah*, 2008 - 2014

Assistant Professor, Meteorology Department, *University of Utah*, 2002 - 2008

Huber Fellow, Princeton Environmental Institute, *Princeton University*, 2000 - 2002

### **Other academic appointments**

Visiting Professor, *Université de Lille I*, Lille, France, 2016-2017

Visiting Scientist, *Centre de Météorologie Spatiale de Lannion*, June, 2015

Visiting Professor, *Université Blaise Pascal II*, Clermont-Ferrand, France, Summer, 2013

Visiting Professor, *Université de Lille I*, Lille, France, 2008-2009

Secondary School Science, Math, and Physics Teacher, *U.S. Peace Corps*, Taufa'ahau-Pilolevu College, Kingdom of Tonga, 1995-1997

### **Awards and distinctions**

1. *Anthem* Bronze Award in the category of Sustainability, Environment and Climate Awareness 2022, collaborator in *Artivism for Earth*
2. Senior Editor *Atmospheric Chemistry and Physics* 2021 - present
3. *CELEBRATE U: A Showcase of Extraordinary Faculty Achievements: Innovator/Entrepeneur*, 2020
4. Advisor: *BioPhysical ECOnomics Institute* 2021 - present (Economic strategy group)
5. Advisor: *The Curve Triangle & Rectangle Institute* 2019 - present (Finance group)
6. Advisor: *The FAN initiative* 2016 - present (Global strategy group)
7. Director Scientific Partnerships: *Geneva Global Initiative* 2018 - 2020 (Global strategy group)
8. Advisor: *Belua*, 2014 - 2016, 2022 - present (Social media start-up)
9. Chief Scientific Advisor: *Particle Flux Analytics* 2018 - present (Meteorological instrumentation)
10. Co-Founder and President: *Particle Flux Analytics* 2015 - 2018 (Meteorological instrumentation)

11. Co-Founder and President: *Fallgatter Technologies* 2012 - 2015 (Meteorological instrumentation)
12. *NASA New Investigator Program Award*, 2005 - 2008
13. *Huber Fellowship*, Princeton Environmental Institute, Princeton University, 2000 - 2002
14. *Atmospheric Chemistry Colloquium for Emerging Senior Scientists (ACCESS)*, Invited participant, 2002
15. *Outstanding Student Paper Award*, AGU Fall Meeting, 1999

## Research interests

Clouds and precipitation play a key role in climate by removing pollutants from the atmosphere, shielding the Earth from sunlight, acting as pistons in the atmospheric heat engine, and serving as a lynchpin in the water cycle. They are dynamic over a vast range of interacting scales in time and space which makes them difficult to understand. My research aims to describe these phenomena using a combination of theory, measurements, and numerical modeling.

## **Invited Presentations**

1. *The overlooked impact of turbulence on the settling speed of precipitation* National Taiwan University, Taipei, Taiwan, December 12, 2023
2. *Observed invariance of the distribution of cloud sizes to regional climatology*. Academia Sinica, Taipei, Taiwan, December 11, 2023
3. *Invited moderator: Workshop on the Dynamics of Climate and the Macroeconomy*. National Academy of Sciences, Washington, D.C. November 1 to November 2, 2023
4. *Symmetries and asymmetries in how falling snowflakes interact with irregular turbulent atmospheric flows* University of Minnesota, October 3, 2023

5. *Cloud sizes from millimeter to planetary scales* Catholic University of Louvain, June, 2023
6. *Cloud sizes from millimeter to planetary scales* University of Lille, May, 2023
7. *New techniques for the precise measurement of hydrometeor mass, density, clustering, and settling response to turbulence.* Deutscher Wetterdienst, Weilheim, Germany, September, 2022
8. *Symmetries and asymmetries in the interactions of falling snowflakes with irregular turbulent atmospheric flows.* École Polytechnique Federale de Lausanne (EPFL), Switzerland, September, 2022
9. *The thermodynamic origins of wealth and its implications for inflation in a dying world.* IAISAE Thermodynamics 2.0, Appalachian State University, July 2022
10. *How many snowflakes fit in a milligram? New automated measurements of hydrometeor mass, density, and fallspeed.* International Partnership for Cirrus Studies, October 2021
11. *The present is tied to the past: A scaling law linking current global energy consumption to historically cumulative economic production.* Joint European Thermodynamics Conference, June, 2021
12. *Jevon's Paradox: Why increasing energy efficiency will accelerate global climate change.* Centre for Crisis Studies and Mitigation at the University of Manchester, February, 2021
13. *Is cloud dynamics impossibly complex or fundamentally simple?* NASA Jet Propulsion Laboratory Center for Climate Sciences, Pasadena, California, November 2019
14. *Towards coincident measurement of hydrometeor size shape, mass, density and fallspeed,* École Polytechnique Federale de Lausanne (EPFL), Switzerland, May, 2019
15. *Towards coincident measurement of hydrometeor size shape, mass, density and fallspeed,* Université Blaise-Pascale, Clermont-Ferrand, France, May, 2019
16. *Are the impacts of aerosols on convective cloud fields constrained by bulk tropospheric thermodynamics?* Short-Lived Climate Pollutants Workshops, Jeju-do, South Korea, November 2018
17. *New puzzles in precipitation microphysics revealed by the Multi Angle Snowflake Camera* Korean Meteorological Association Annual Meeting, Jeju-do, South Korea, October, 2018
18. *Impacts of Aerosols from Biomass Burning and Anthropogenic Pollution Sources on Low-Level Arctic Clouds,* American Meteorological Society Annual Meeting, Austin, Texas, January, 2018,
19. *Aerosols, clouds, and precipitation in the Arctic: Who's in charge?,* NETCARE Workshop, University of Toronto, Toronto, November, 2017
20. *Energy, Thermodynamics, and the Human Enterprise* Crans Meeting on Energy, Finance, Economy and Governance Risks, Crans, Switzerland, July, 2017
21. *The distinctive nature of aerosol-cloud-radiation feedbacks in the Arctic.* University of Leipzig, Leipzig, Germany, May, 2017.
22. *Impacts of long-range aerosol transport on phase transitions in Arctic clouds,* SLCP Meeting, Gangneung, South Korea, February 2017
23. *Power laws in tropical cloud fields and the relationship to atmospheric stability,* EECLAT Workshop, Baie de la Somme, January 2017

24. *Turbulence and temperature effects on hydrometeor fallspeed.* Université de Grenoble, France, January, 2017
25. *Turbulence and temperature effects on hydrometeor fallspeed.* Université Blaise-Pascal, Clermont-Ferrand, France, November, 2016
26. *Turbulence and temperature effects on hydrometeor fallspeed.* École Polytechnique Fedérale de Lausanne, Lausanne, Switzerland, September, 2016
27. *The distinctive nature of aerosol-cloud-radiation feedbacks in the Arctic.* Yonsei University, Seoul, Korea, February 20, 2016.
28. *The complexity of interactions between aerosols, clouds, precipitation and radiation in the Arctic.* Korean Meteorological Society workshop on Short-Lived Pollutants. Songdo, Korea, February 13, 2016
29. *The distinctive nature of aerosol-cloud-radiation feedbacks in the Arctic.* Seoul National University, Seoul, Korea, February 14, 2016.
30. *Market expectations in retirement planning: an evolutionary and thermodynamic perspective.* Retirement Income Industry Association Advisor Forum Week, Fort Lauderdale, March 11, 2015
31. *Aerosols, clouds, precipitation, radiation and climate: A problem of interactions across scales,* Korean Meteorological Society Annual Meeting, Jeju, Korea, Oct 13, 2014
32. *Aerosols, clouds, precipitation, radiation and climate: A problem of interactions across scales,* Gangneung University, Korea, Oct 16, 2014
33. *The Jevons Paradox: Why the increasing energy efficiency of the economy is accelerating global climate change* Duke University School of the Environment, Durham, NC, Sept 12, 2014
34. *Wealth is Power. What physics tells us about our financial future.* Chartered Financial Analyst Society of Indianapolis Annual Meeting. Carmel, IN, March 17, 2014.
35. *Why is the Arctic summer clean? Will the Arctic get cleaner? How wet scavenging controls the impacts of mid-latitude pollution in the Arctic.* AGU Fall Meeting, San Francisco, December 9-13, 2013
36. *Photographing snowflakes in freefall at Alta:* Université Blaise Pascal II, Clermont-Ferrand, France, May, 2013
37. *Thermodynamic constraints on economic innovation and growth:* Gruter Institute: Innovation, Economic Growth and Human Behavior, Squaw Valley, June 21-23, 2012
38. *Modes of growth in economic systems:* Gruter Institute: Economic Growth: Costs, Causes and Effects, Squaw Valley, June 23-25, 2012.
39. *Mountain meteorology: Precipitation and snow crystals in the atmosphere:* Avalanche science workshop, Mammoth, California, March 2012.
40. *Wealth is Power: Consequences and Implications for Retirees:* Keynote Talk for the Retirement Income Industry Association, Chicago, March, 2012

41. *A Simple Method for Diagnosing the Dynamic Response of Cloudy Air to Diabatic Heating and Cooling* University of Berkeley, California, February, 2012.
42. *Can we provide thermodynamic constraints for the long-term coupled evolution of the economy and the atmosphere?* Third Santa Fe Conference on Global and Regional Climate Change, October 2011.
43. *How will aerosol-cloud-precipitation-radiation interactions evolve in a warming Arctic?* Michigan Tech., September, 2011.
44. *How will aerosol-cloud-precipitation-radiation interactions evolve in a warming Arctic?* NASA Jet Propulsion Laboratory, August, 2011
45. *Application of simple (non-equilibrium) thermodynamics to constrain long-range economic growth and its coupling to atmospheric concentrations of CO<sub>2</sub>* Northwest Research Associates, July, 2011
46. *Is it physically possible to have our economic prosperity and stabilize atmospheric CO<sub>2</sub>?*: University of Edinburgh, June, 2011
47. *Will warming temperatures mediate the effects of short-lived aerosol pollutants on Arctic climate?*: University of Michigan, January, 2011
48. *Mammatus Clouds: A Window Into the Role of Radiation-Dynamic Feedbacks in Stratiform Cloud Evolution*: Texas A&M University, December, 2010
49. *Is it possible to de-couple economic wealth from carbon dioxide emission rates?*: Pacific Institute for Climate Solutions, University of Victoria, May, 2010
50. *Long-range pollution transport to the Arctic and its role in modulating regional aerosol-cloud-climate interactions*: Max-Planck Institute for Meteorology, Hamburg, Germany, June, 2009
51. *Remote sensing of clouds, precipitation and radiation in the Arctic and associated interactions with pollution from mid-latitudes*: Université de Blaise Pascal, Clermont-Ferrand, France, February, 2009
52. *A simple thermodynamic approach to the economic evolution of civilization and its carbon dioxide emissions*: Max Planck Institute for Biogeochemistry, Jena, Germany, January 2009
53. *What exactly is the difference between clear-sky and cloud?*: University of Bremen, December 2008
54. *All other things being equal: On the role of feedback in aerosol-cloud interactions*. University of Edinburgh, September, 2008
55. *Arctic climate forcing through aerosol-cloud interactions*. AMAP Workshop on Non-CO<sub>2</sub> Climate Forcers, Oslo, Norway, September 2008
56. *On the evolution of cloud systems*: Frontiers of Climate Conference, Kavli Institute of Theoretical Physics, Santa Barbara, California, May, 2008
57. *A look at the evolution of clouds*: University of Arizona, Tucson, April 2008
58. *Longwave and shortwave effects of aerosol interactions with clouds in the Arctic*: Norwegian Institute for Air Research, Kjeller, Norway, November 2007.
59. *Might anthropogenic aerosol be stimulating Arctic sea ice melting through their effects on clouds?* University of Toronto, September, 2007

60. *Is Arctic sea-ice melting stimulated by aerosol-cloud-radiative interactions?* Gordon Conference on Radiation and Climate, July, 2007.
61. *Is the Cloud System Homeostatic?* Dalhousie University, Canada, May, 2007
62. *Arctic Haze and Winter Warming* Arctic Climate Workshop sponsored by Clean Air Task Force, NASA GISS, January, 2007
63. *Pollution and the Arctic: 200 years of Man-Made Climate Change*, Wallace Stegner Center, University of Utah, October 2006
64. *Exploring Pollution-Cloud-Climate Interactions in the Arctic*, State University of New York, September 2006
65. *Exploring Pollution-Cloud-Climate Interactions in the Arctic*, Brookhaven National Laboratories, September 2006

## **Teaching**

**Undergraduate** *Atmos 5200: Cloud Physics*

*Atmos 5140: Atmospheric Radiation*

*Atmos 5130: Atmospheric Thermodynamics*

*Atmos 5210: Physical Meteorology*

Radiative Transfer and Climate, Thermodynamics, Cloud Physics

*Atmos 3410: Meteorological Analysis*

Using Matlab for time series analysis, fourier analysis, statistical analysis, and numerical modeling

**Graduate** *Atmos 6020: Physical Meteorology*

Radiative Transfer and Climate, Thermodynamics, Cloud Physics

*Atmos 6200: Radiative Transfer and Climate*

Physical principles and mathematical methods for approaching longwave and shortwave radiative transfer in the atmosphere

*Atmos 6300: Advanced Cloud Physics*

Cloud thermodynamics, microphysical and radiative processes, similarity theory, cloud dynamics, mixed-layer modeling

## **Undergraduate Students Advised**

1. Lisa Verzella 2008: Undergraduate Research Assistant
2. Miranda Oliver 2012: University of Utah UROP program
3. Karlie Rees 2016-2018: Atmospheric Sciences Capstone Project
4. Logan Hill: 2018 - 2019 University of Utah UROP program
5. Alex Blackmer 2019 - present University of Utah UROP program
6. Ashley Evans, 2021 Summer University of Utah REALM program

7. Daniyar Kushaliev Undergraduate Research Assistant Summers 2019, 2021
8. Alex Garrett Undergraduate Research Assistant Summers 2022, 2023, Winter 2024

## Graduate Students Advised

1. Bradley Navarro. M. S. 2003 *Microphysical and Radiative Evolution of a Cirrus Anvil During CRYSTAL-FACE*
2. Nathaniel Mullins M. S. 2005 *Case Study of a Jet Contrail at the Tropopause: Properties, Evolution and Radiative Effects*
3. Margaret Kimball M. S. 2006 *Convectively Driven Formation of Thin Cirrus in the Tropopause Transition Layer*
4. Lance Avey M. S. 2006 *Evaluation of the aerosol indirect effect using satellite, tracer transport model, and aircraft data from ICARTT*
5. Chuanfeng Zhao Ph. D. 2007 *Effects of Arctic Haze on Low-Level Stratus Properties and the Surface Radiation Budget*
6. Stina Sjöström, M. S. Uppsala University, Sweden 2007 *Numerical Exploration of Radiative-Dynamic Interactions in Cirrus*
7. Kyle Tietze, 2007 - 2011, M. S., 2010 *Spaced Based Evaluation of the Aerosol Indirect Effect in the Arctic*
8. Clint Schmidt, 2007 - 2013, M. S. 2010 *A Simplified Model for Understanding the Evolution of Cirrus Clouds*
9. Melissa Maestas, 2008 - 2009
10. Sara Brattström, M. S. Stockholm University, Sweden, 2011 *The role of scavenging in the seasonal transport of black carbon and sulfate to the Arctic*
11. Zhiyu Wang, 2009 - 2015
12. Quentin Coopman, 2013 - 2016, Ph.D., 2016 *Impact of Aerosols on Arctic Clouds*
13. Shailesh Alva, 2014 - 2015
14. Maximilien Patou, 2015 - 2018, Ph.D. 2018 *Temporal analysis of the optical, microphysical and macrophysical properties of strongly precipitating cloud systems from SEVIRI/MSG*
15. Kyle Fitch, 2017 to 2020. Ph.D. *Solid precipitation and boundary layer clouds in the Arctic: A focus on riming*
16. Ahmad Talei, 2017 - 2021 Dissertation: 2021 *Hydrometeor Settling Velocity in a Turbulent Flow*
17. Karlie Rees, 2018 to present. M.S. 2020. *Direct hydrometeor mass measurements to determine snow density and other atmospheric parameters*
18. Ryan Szczerbinski 2021 to present
19. Thomas DeWitt 2021 to present

## **Graduate Student Committees**

1. Eric Vernon, M.S., 2002
2. Yuying Zhang M.S., 2002
3. Yaping Li, M.S. 2002
4. Haiyan Jiang, Ph.D. 2004
5. Kristen Dowd, M. S. 2004
6. Yuying Zhang, Ph. D. 2006
7. Ryan Riveland, M. S. 2006
8. Helena Schlueter, M. S. 2006
9. Daniel Hartsock, M.S. 2006
10. Jennifer Esker, M. S. 2006
11. Scott Robertson, M. S. 2007
12. Lis Cohen, M.S. 2008
13. Betsy Dupont, M.S. 2010
14. Peter Bogenshutz Ph.D. 2011
15. Michael Peterson, M. S. 2011
16. Samantha Balaich, M.S. 2012
17. Christy Wall, Ph.D. 2013
18. Kevin Hammonds, M.S. 2013
19. Chris Schwartz, Ph.D. 2013
20. Shan Zheng, Ph.D. *Université de Lille* 2014
21. Ian Glenn, M.S. 2013, Ph.D. 2017
22. Trevor Ferguson, M.S., 2014
23. Stephen Bannister, Ph.D. 2016
24. Arpa Hudait Ph. D. 2018
25. Quentin Coopman, Ph.D. 2016
26. Sarah Bang, Ph.D 2018
27. Jeanna Mascio, Ph.D. 2018
28. Betsy Berry, Ph.D. 2020

29. Dustin Roten, Ph.D. 2022
30. Manikandan Rajagopal, Ph.D. 2022
31. Mathieu Renault, Ph.D. 2024
32. Daniel Baldesarre, Ph.D. 2024
33. Haley Scott M.S. 2023
34. Kelsey Barber
35. Tanvir Ahmad Ph.D. 2024

### **Postdoctoral advisor**

Steven Cooper  
Matheus Gergely  
Dhiraj Singh

### **Service and Outreach**

1. Senior editor 2021 to present, *Atmospheric Chemistry and Physics*
2. Internal reviewer University of Utah Masters of Statistics Program 2023
3. University Conflict of Interest Committee 2022 to 2023
4. Panel Review Committee for NSF MRI program, May 2023
5. Research on snowflake photography, turbulence studies, energy and economic growth, Arctic pollution and clouds, and cirrus clouds has been profiled in independent articles, documentaries, radio interviews, and television appearances for *National Geographic*, *New Scientist*, *Science et Vie*, *Weather.com*, *CBC Television*, *Fox News*, *NBC*, *Yahoo*, *Gizmodo*, *Science*, *Le Monde*, *Figaro*, *The Guardian*, *Vice*, *Wired*, *EOS*, *Continuum*, *AdvisorOne Research magazine*, *International Innovation*, *Institutional Investor*, *Audubon*, *Collapse Chronicles*, *Slashdot*, *Helix*, *Photonics*, *Powder*, *Owl*, *The Avalanche Review*, *KOMO*, *BBC-5*, *NPR*, *KCLU*, *Radio EcoShock*, *KSL*, *ABC4*, *KUER*, *Fox13*, *ABC*, *Salt Lake Tribune*, *Deseret Morning News*, *PhysicsWorld*, *Science News for Students*, *The Statesman*, *Utah Stories*, and *Christian Science Monitor*, *Planet Critical*, *The National Science Foundation*, *Physics Today*, *American Institute of Physics*, *The University of Utah*
6. Regular journal article reviewer for eg. *Nature*, *Science* and *AMS*, *AGU*, *EGU*, *Blackwell*, and *IEEE* journals
7. University Promotion and Tenure Advisory Committee, 2018 to 2021
8. Panel Review Committee for DOE, March 2021
9. Panel Review Committee for NSF Polar Programs October 2020
10. Editor, 2007-2021, *Atmospheric Chemistry and Physics*

11. Panelist for “Wildfires, Drought, Air Pollution: The Growing Climate Crisis”, Orem Public Library, November 28, 2018
12. University Graduate Council, 2014 to 2016
13. University of Utah Senate, 2010 to 2013
14. University Personnel and Elections Committee 2010 to 2014
15. Associate Editor, 2003-2010, *Journal of Atmospheric Sciences*
16. Panel Review Committee for NSF Polar Programs, October 2019
17. Panel Review Committee for NASA NEWS, August, 2014
18. Panel Review Committee for DOE, May, 2012
19. Panel Review Committee for NASA CloudSat/Calipso July, 2010
20. Panel Review Committee for NOAA Office of Global Programs, October, 2004
21. Regular proposal reviewer for NASA, NSF, DOE, and NOAA
22. Garrett, T. J., 2014: *Snowflake Formation: A series of lessons plans for 4th through 6th grade.* Presented in Salt Lake City and Bountiful 4th Grade classrooms.
23. Presenter for “Science Movie Night” at the Downtown Public Library, December 9, 2014
24. Snowflake research featured for a 2013 documentary for The WeatherChannel entitled *Secrets of the Earth: Blizzards*
25. Snowflake research featured for a 2014 documentary for the Canadian Broadcasting Corporation entitled *The Nature of Things: Chasing Snowflakes*
26. Provide real-time snowflake photographs for the “Snowflake Showcase” website hosted by Alta Ski Area
27. Invited panelist for “Focussing Cache: The Science of Climate”, Utah State University, January 31, 2008
28. Presenter for “Natural History Now!” at the Utah Museum of Natural History, February 1, 2008
29. Presenter for Hogle Zoo, June 28, 2008
30. Alta Historical Society “Fireside Chat” 2011, 2012.
31. Presenter for American Meteorological Society Salt Lake Chapter 2013

## **Externally Awarded Research Funding to University of Utah (Total \$6,442,797 )**

1. **NASA** *Optical Properties of Tropical Cirrus Clouds.* P. I. T. J. Garrett, Co-P.I. H. Gerber. \$136,389. 01/2002 - 01/2004.
2. **NSF** *Aerosol-Cloud-Radiation Interactions in the Arctic.* P.I. T. Garrett, co-P.I. Xiquan Dong, Gerald G. Mace. \$339,503. 04/2003 - 04/2006.
3. **NSF** *New Approaches for the Measurement of Microphysics in Extratropical Hurricanes.* P.I. T. J. Garrett. \$19,946, 07/2003 - 07/2004.
4. **NOAA** *2003 Aerosol-cloud-climate interactions downwind of North Eastern North America.* P.I. T. J. Garrett. \$351,234. 03/03 - 03/06.
5. **NASA** *Airborne Studies of Middle and Low-Latitude Cirrus.* P. I. T. J. Garrett. \$86,882. 01/04-01/05.
6. **NSF** *Formation and evolution of pileus cloud near the tropopause.* P. I. T. J. Garrett \$35,693. 1/1/06 - 12/31/06.
7. **NASA** (New Investigator Program Award) *Interaction between microphysics, radiation and dynamics in terrestrial cirrus.* P. I. T. J. Garrett \$339,976. 8/1/06 - 7/31/09.
8. **NSF** *Evaluation of Aerosol-Cloud-Radiation Processes and Feedbacks in the Alaskan Arctic.* P.I. T. J. Garrett \$324,121 6/1/07-5/30/10.
9. **Clean Air Task Force** *Quantifying the significance of mid-latitude pollution plumes to clouds and sea-ice melting in the Arctic,* \$100,000 6/1/07-10/30/09.
10. **NASA** *Evaluating tropical and mid-latitude cirrus properties using co-incident satellite and aircraft sensors,* P.I. T. J. Garrett, co-P.I. Jay Mace, \$240,000, 1/1/08-12/31/11
11. **Army** *Development of automated measurement techniques for improved parameterization of snowflakes in mesoscale weather models* \$49,620, 11/1/09-6/30/10
12. **Ewing Marion Kauffman Foundation** *How does energy govern innovation and global economic growth?* \$38,837, 4/1/2011 - 8/30/2012
13. **NASA** *NASA Earth System Science Fellowship to Clinton Schmidt: Application of CERES energy budget data to improve understanding of the dynamic role of clouds in the Earth's planetary albedo* \$90,000 9/1/2011 - 8/30/2014
14. **NSF** *Collaborative Research: The Wasatch Hydrometeor Aggregation and Riming Experiment* \$450,000 8/1/2011-7/31/2014
15. **Ewing Marion Kauffman Foundation** *Forecasting Civilization Expansion and Innovation as a Function of Energy Reserve Discovery* \$47,490, 4/1/2012 - 3/30/2013
16. **NASA** *NASA Earth System Science Fellowship to Zhiyu Wang: How will future Arctic sea ice decline impact atmospheric stability and cloudiness?* \$90,000 9/1/2012 - 8/30/2015
17. **NSF** *Impacts of distant pollution sources on microphysical transitions in Arctic clouds* \$459,658 9/1/2013 - 8/30/2016

18. **NASA** *A snowflake mass measurement device for the NASA Global Precipitation Measurement Mission* \$50,000 12/1/2013 - 6/30/2014
19. **NSF** Development of a Freefall Precipitation Camera for Weather Monitoring Systems. Sub-contract from Fallgatter Technologies: \$71,248, 5/1/2014 - 4/30/2015
20. **DOE** *High temporal and spatial resolution measurement of hydrometeor mass for automated assessment of precipitation rate and type.* Sub-contract from Particle Flux Analytics: \$102,032, 3/1/2017-12/31/2017
21. **DOE** *Parameterization of arctic hydrometeor physics using new precipitation measurement technologies* \$457,847, 9/1/2017 - 8/30/20
22. **DOE** *High temporal and spatial resolution measurement of hydrometeor mass for automated assessment of precipitation rate and type.* Sub-contract from Particle Flux Analytics: \$449,746, 5/1/2018-4/30/2020
23. **NSF** *Observational and Theoretical Investigations Related to Hydrometeor Settling in Turbulent Air* \$591,559, 4/15/2019 - 4/14/2022
24. **Transportation and Avalanche Research Program:** *A networked low-cost distributed weather and snowfall sensor array demonstration project for improved avalanche hazard mitigation in Little Cottonwood Canyon, Utah.* \$55,459 8/1/2019 - 7/31/2019
25. **NSF** *New Tools for Quantifying Cloud Response to Varying Climate State* \$667,219, 11/01/20 - 10/31/2023
26. **DOE** *Phase I: Miniaturized weather station with rapid switching between precipitation and meteorological measurement modes* Sub-contract from Particle Flux Analytics: 5/1/2018-4/30/2020. \$84,400 02/14/22 - 11/13/22
27. **NSF** *Observational and Theoretical Investigations Related to Hydrometeor Settling in Turbulent Air* \$747,025, 4/15/2022 - 4/14/2025
28. **DOE** *Phase II: Miniaturized weather station with rapid switching between precipitation and meteorological measurement modes* Sub-contract from Particle Flux Analytics: \$282,466, 5/1/23 - 4/30/25

### **Externally Awarded Research Funding to University of Utah Spin-off Company Particle Flux Analytics**

Combined funding from DOE and NSF of approximately \$4.5 MM.

### **Field Work**

1. **NASA CRYSTAL-FACE**, Summer 2002: Integrated Cloud Integrating Nephelometer (CIN) onto the NASA WB-57 aircraft for the study of Florida anvil cirrus.
2. **CNRC ETHEX**, Fall, 2003: Integrated CIN onto Canadian National Research Council CV-580 Airborne Facility for flight into mid-latitude Hurricane systems.
3. **NASA MidCiX**, Spring, 2004: Integrated CIN onto the NASA WB-57 for the study of mid-latitude and sub-tropical anvil cirrus.

4. **NOAA ICARTT**, Summer, 2004: Integrated CIN, FSSP-100 and OAP 2D-C onto NOAA and CNRC aircraft for the study of the effects of North American pollution on cloud radiative properties.
5. **NSF WASHARX**: 2012 to 2015: High resolution imaging of snowflakes at the High Altitude Research Laboratory for Diversity in Snow (HARoLDS) at 10,000' at the Alta Ski Area.
6. **DOE Snowflake Settling Speed Experiment**: Winter 2017: Study of hydrometeor fallspeeds at Oliktok Point, Alaska.
7. **NSF CHALICE**: February 2019 to present: Study of hydrometeor properties and settling in turbulent air at Red Butte Canyon, Alta Ski Area, and the Alta Atwater Plot Utah.

### **Professional Memberships**

American Meteorological Society. 2000 - present

American Geophysical Union 1998 - present

European Geophysical Union
